Corrected Transit Hours vs. Raw Transit Hours

Corrected Transit Hours by Hub Name

Key Point: The corrected average transit time is **61.90** hours versus **61.29** hours raw. Of the shipments that have been physically **delivered**, exactly **0.95%** of those records were excluded as impossible timestamps. After the June 2022 app fix, the raw and corrected transit hours are identical, confirming the bug is entirely historical.
